

Egomet

The Egomet ecosystem, meets all levels of security and support, required by the most complex and secure multi-factor authentication services, including PSD2 and eIDAS standards.

This datasheet covers the features of Egomet - Onboarding.

The Ecosystem consists of 3 modules:

Onboarding

Egomet - Onboarding is the perfect system to digitize identity, by scanning electronic documents like passports or identity cards. Ideal in recovering the REAL user's data in a fast and smart way.

FIDO

Egomet - FIDO (Fast Identity Online) provides a secure and simple solution to today's password problem. The standard is used by the biggest online services companies.

Mobile Connect

Egomet - Mobile Connect is a secure universal authentication system. By matching the user to his phone number, Mobile Connect grants access to digital services without having to type in credentials. It can be integrated with Egomet - FIDO, that through the use of biometrics, can add a further security level and a faster user experience.

About us:

With over 20 years of expertise, Movenda has become leader in the mobile identity market, focusing on development of innovative carrier-grade software platforms dedicated to identity management and remote management.

Movenda works within the major international software standardization committees such as GSMA and FIDO Alliance.
